Update on the missing PDF issue

JUNE 27, 2018 RACHEL BRENNESHOLTZ

Message from Laura Thomson, Head of Reference Management

Update 6 July 2018

Our team continues to work round the clock to fix the issues experienced by affected users however, this is a complex issue and it is taking us a little longer than we anticipated. We expect to have a solution deployed by the end of next week for most users, but it is likely it will take us into the week after (week starting 16 July) to fully implement the fix for all users.

Thank you for bearing with us, we appreciate your patience. We will keep you updated via this channel and our social media accounts.

We know it's been a difficult time for some users who experienced problems with missing PDFs and issues related to the recent Mendeley Desktop update. Most of us have been researchers ourselves, so we understand the concern that losing PDFs and annotations has caused. We apologize unreservedly.

As you might expect, we've been working round the clock to fix the issues experienced by affected users. Our team has now identified the reasons behind these issues and are working to resolve them.
